

My family and I are subscribers to XM Radio. We are very pleased with the diversity of high quality programming offered by satellite radio, including the local traffic and weather. Satellite radio is especially valuable now that the quality of programming in FM and AM broadcast radio has declined precipitously, due to the unfortunate legislation that increased the number of stations a single company is allowed to own. We respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that we deserve, and are willing to pay for.
